Re: Arsynco, Inc. Site
Carlstadt, New Jersey

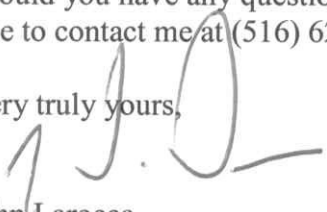

Dear Mr. Stoller:

This letter is provided in accordance with Part 8. of the United States Environmental Protection Agency's (USEPA) approval of Arsynco's request for risk-based disposal of PCB remediation waste (the "Approval"), which became effective on July 20, 2009. The purpose of this letter is to provide Arsynco's assurance to USEPA that all authorized USEPA representatives may enter the Arsynco site at reasonable times for the following purposes:

1. to inspect the Consolidated Material TSCA Disposal Area and the Former On-Site Pond TSCA Disposal Area of the Arsynco Site to assess compliance with the Approval and/or the federal PCB regulations;
2. to inspect any records related to the Approval and/or federal PCB regulations; and,
3. to collect samples for the purpose of assessing compliance with the Approval and/or the federal PCB regulations. Arsynco will be given the opportunity to split samples collected by EPA representatives, provided this does not compromise EPA's sampling activities or the samples which EPA collects.

Should you have any questions or require additional information regarding this matter please feel free to contact me at (516) 627-6000.

Very truly yours,

John Larocca
Assistant Treasurer
